

Avena

Always Non-GMO

Non-GMO Feed for your Homestead

Made from premium ingredients. Pure & Honest. Avena is always Non-GMO. It's our guarantee to you.

Pure & Honest. Non-GMO, whole grains are Avena's quality protein source. Formulated with Natural Way Minerals to improve digestion and increase feed efficiency, the whole grains are easily converted to growth and energy. Avena feeds are made from only premium Non-GMO ingredients without fillers, byproducts, or medications. We work closely with independent nutrition specialists to formulate feeds that help your animals achieve more with less feed.

Where We Come From

Avena's *Always Non-GMO* family of feeds dates back to 2015 when the Original Horse Feed was developed by Mt. Hope Elevator, a 100 year old feed mill known for its nutritional expertise. The Avena name was born and officially adopted in 2020. *Avena* is derived from the scientific name for oats in its purest form: *Avena sativa*.

After experiencing great results with their horses, customers naturally started asking for Avena to feed their other animals. Today, Avena offers a variety of quality feeds and continues to develop new, *Always Non-GMO* recipes for needs in the market. Please contact us if you are looking for a Non-GMO feed for a specific animal or application.

Non-GMO Grain

All of the grain used in our recipes is Non-GMO and is tested to meet our quality standards on toxins and foreign matter. Non-GMO grain is more easily digested, creating a more effective and efficient feed.

Mineral Content

Avena Feeds are fortified with quality, naturally mined minerals. Adding our unique blend of vitamins & minerals minimizes the need of top dress for maintenance feeding. The vitamins, trace minerals, Hy-brix clay, and black powder humates are key elements in Avena Feeds to improve reproduction and keep your animals healthy.

All Avena Feeds are whole grain formulas with no fillers, byproducts, or medications.

NEW

COMING SPRING 2025

COLT FEED

Ask our sales representatives for more details.

Features

- Whole grain formula
- Higher protein for faster growth
- A complete, balanced feed
- Healthy body structure

Call the Elevator and ask us about our bulk delivery options.

Horse Feeds

ORIGINAL HORSE FEED Tested and Proven. Our original recipe is a proven performer. This feed is fortified with naturally mined minerals (NWM) that have improved the overall health of many top performing horses. It is a complete, balanced feed for improved gut health, better haircoat, more energy, natural parasite removal, and the elimination of harmful toxins.

Features

- Ultimate blend for energy
- Improves overall health
- Natural parasite & toxin removal
- Contains whole roasted soybeans

Feeding Directions

Feed 3-4 lbs. morning and evening for a 1200 lb horse, with quality hay, water, and salt. Store in a dry place.

12% protein | 8% fat | 50 lb bag

NO CORN HORSE FEED is the same recipe as our proven Avena Horse Feed but without the corn. No corn equals less starch, which means less sweat and less heat in your horse. A great summer or calm energy blend. Like the original recipe, using only the best ingredients, this complete feed is fortified with trace minerals that have improved the overall health of many horses.

Features

- More calm energy
- Contains whole roasted soybeans
- Natural parasite & toxin removal
- A complete, balanced feed

Feeding Directions

Feed 3-4 lbs. morning and evening for a 1200 lb horse, with quality hay, water, and salt. Store in a dry place.

12% protein | 8% fat | 50 lb bag

Barnyard Feeds

PASTURE PIG FEED has rich mineral content that minimizes the pigs' desire to root, leaving the pasture in better condition and the pigs healthier and more relaxed. With help from Kristy Zentiska from Himelrigh Farms in Barberton, Ohio, Avena conducted extensive testing that showed thriving, healthy pigs and reduced rooting.

Features

- Minerals to minimize rooting
- Promotes healthy growth
- Improves overall health

Feeding Directions

Feed as the complete ration to pigs on pasture weighing 25 pounds to mature weight. Always provide plenty of fresh water.

18% protein | 4.5% fat | 50 lb bag

PIG FEED is a lower protein feed than the pasture pig feed but has the same mineral content. This is a grower/finisher for market hogs. Its well-balanced mineral package is great for the pig's overall health.

Features

- Fortified with trace minerals
- Reduces parasites
- Improved overall health

Feeding Directions

Feed as sole ration to growing and finishing pigs. Provide clean fresh water at all times.

14% protein | 4% fat | 50 lb bag

BARNYARD BLEND was developed for a variety of ruminants, avoiding the need to feed a different blend for each animal. It will feed your dairy cow, the steer you are preparing for the freezer, and your sheep and goats. Avena's naturally mined trace copper will not harm your sheep or any other animal like the copper sulfate found in most commercial steer feed.

Features

- One feed for the whole barnyard
- Safe for sheep
- Enhanced overall health

14% protein | 6% fat | 50 lb bag

Feeding Directions

Feed to ruminant animals in combination with forage to provide complete ration. Feed to dairy goats at a rate of 2 lbs/hd/day. For cattle, feed 14-18 lbs/hd/day. Can be fed to cattle, sheep, and goats. Provide free choice mineral, hay, and clean, fresh water at all times.

Poultry Feeds

CHICK STARTER is a non-medicated chick starter without any harmful growth hormones, benefiting both the bird and the consumer. Enhanced with NWM prebiotics and probiotics, this blend is formulated to fight bad bacteria and build up the immune system. By keeping sicknesses at bay, it allows the chick to channel its energy into healthy growth.

Features

- No harmful growth hormones
- A complete feed from 1 day old to 7 weeks
- Builds the immune system

Feeding Directions

Feed to broiler chicks from 0-4 weeks old.
Feed to layer chicks from 0-7 weeks old.

21% protein | 4% fat | 50 lb bag

**If you're concerned about potential loss with a non-medicated feed, then simply add Natural Way Mineral's Knockout and Vita-Min-Liq to their water for the extra boost some chicks require.*

POULTRY GROWER contains naturally mined minerals (NWM) and Lysine, which convert protein into growth with less effort. Fortified with NWM probiotics and prebiotics, it boosts digestibility and improves their immune systems, ensuring your birds thrive without medication. Reduce wasted energy on fighting sickness and say hello to healthy, growing birds!

Features

- Promotes healthy growth
- Better digestibility
- Improved immune system

Feeding Directions

Feed to broilers from 4 weeks to market.
Feed layer chicks from 7 weeks to 16 weeks.

19% protein | 4% fat | 50 lb bag

LAYER MASH is designed as a complete ration for laying chickens. This feed has proven to boost the amount of eggs produced. And not just eggs, but eggs that are visibly brighter in color and hold their shape in a skillet. The Natural Way Minerals included in this formula aid digestion and improve the bird's immune system, creating a premium feed with healthy results.

Features

- Brighter, healthier eggs
- More eggs with less feed
- Improved overall health

Feeding Directions

Start feeding to layer hens at 16 weeks old.
Can be fed throughout the rest of the bird's lifespan.

16% protein | 3% fat | 50 lb bag

Non-Medicated Turkey Feed: *The Natural Choice for Your Birds!*

Protein Delivery

Lysine is used to transport protein to the bloodstream, helping to transform it into meat on the bones and a healthy bird.

Super Charged Immunity

These non-medicated feeds are supplemented with prebiotics and probiotics, creating a super charged immune system.

Filter Included

Biochar works like a coffee filter- sifting out the bad bacteria that would otherwise clog the system.

TURKEY STARTER

28% protein | 5% fat | 50 lb bag

Feeding Directions

Feed to meat turkey chicks from 0 - 56 days.

TURKEY GROWER

23% protein | 6.5% fat | 50 lb bag

Feeding Directions

Feed to meat turkeys from 57 - 100 days.

TURKEY FINISHER

18% protein | 6% fat | 50 lb bag

Feeding Directions

Feed to meat turkeys from 100 days to market.
